

Frogs in Many Colors

Frogs in Many Colors

Frogs in Many Colors
By Yein Suh

1.

Frogs come in many colors.

2.

Deepa sees a red frog.

3.

Deepa sees a green frog.

4.

Deepa sees a blue frog.

5.

Deepa sees a yellow frog.

6.

This frog is black, yellow,
blue, and green.

7

Can you see the frog?

8.

Why are frogs so many
different colors?

- Poisonous frogs have bright colors.
- Mimicry: Some frogs that are not poisonous may have bright colors, too. It is a way of confusing predators.
- Camouflage: Many frogs can change their colors according to their surroundings.
- Frogs can avoid predators who would eat them by using their color to confuse or hide.
